“For the Environmentally conscious”
Ultrasonic cleaning system

> US 200

> This Ultrasonic Cleaning System combines a stainless steel cleaning tank with industrial style transducers and a powerful ultrasonic generator to provide the strongest tabletop cleaning available. It gives the speed and effectiveness of ultrasonic cleaning power with the convenience of plug-in-anywhere operation.

> Electromechanical lift of the baskets provided with security device. The baskets automatically sink by pressing a push button on the panel and are automatically lifted at the end of the cycle (no physical operation is required).

> Water recirculation through luer lock connections during the cycle - nr. 2 luer lock connections for each level

> Under bench storage for chemical canisters

> A DIN tray basket support and cover are included in the base unit. It meets CSA and UL requirements.

> Critical process parameters such as temperature, ultrasonic power and time are monitored granting the compliance to the international standards and can be recorded.

> key features
- Washing tank made of stainless steel AISI 316L
- External body made of stainless steel AISI 304
- LED display and timer for cycle control
- Automatic tank filling and water control level

- Pump for the automatic chemical dosing
- Automatic minimum level of chemical control with alarm
- Ultrasonic power 1200W with radio frequency interference and power control from 0 to 100 % included.

STANDARD COMPLIANT
Steelco ultrasonic cleaning systems are designed and constructed to comply with the latest European and UK guidelines on decontamination. EN ISO 15883-1/2 and HTM 2030
Steelco ultrasonic cleaning systems are classified CE Medical Device (Community rule 93/42/CEE) code nr. 0051.
